EXPERIENCE SUMMARY

As a skilled and result-oriented Computer Science graduate with a strong focus on Full Stack Web Development, I am the ideal candidate for your team. I have hands-on experience in Back-end Development using Django, and Front-end Development using ReactJs, HTML, CSS, Bootstrap, jQuery, and JavaScript. Additionally, I am well-versed in versioning technologies like GIT and RESTful APIs and have interacted with relational databases such as PostgreSQL and SQLite Server.

I have experience in Cloud-Based Project Management Platforms such as Trello to keep track of projects and ensure deadlines are met. With my passion for technology and commitment to excellence, I am confident that I can contribute to your team's success.

KEY STRENGTHS/SKILLS/COMPETENCIES

- **ReactJs** - Built a seaweed web application that fetches form APIs I created using the Django rest framework.
- **Django** - Created a news web application which fetches recent news from different news sites.
- **Python** - Created a Django-based Instagram clone web application where a user can use CRUD operations to create, read, update and delete profiles, comments and posts while using authentication methodologies.
- **JavaScript** - Created a movie app in collaboration with a team that fetches movies from the movie database and plays trailers from YouTube.
- **Leadership & Collaboration**- Led a team of developers during the project period, from project ideation to the deployment period.

PROFESSIONAL DEVELOPMENT

Moringa School

October 2021 - May 2022

Full-Stack Software Development

ACADEMIC QUALIFICATIONS

University of the People

September 2023 - to date

Bachelor of Computer Science

WORK EXPERIENCE

Full Stack Web Developer - Python, React

January 2023 - April 2023

Mwani Africa

Responsibilities:

- Designed, developed, and maintained a seaweed website using Python(Django) and ReactJ, ensuring optimal performance and user experience.
- Developed, tested, and maintained an always-on and secure front-end and back-end seaweed website.
- Debugging and troubleshooting issues associated with production environments.
- Managed website hosting using cPanel, implementing best practices for server configurations and security.
- Implemented best practices for website security to ensure the website met the highest standards.
- Utilized GitHub for version control and collaboration with the development team, ensuring efficient and effective communication.

PROJECTS SUMMARY

Seaweed Web App

Tools: Python, Django, ReactJs, Html, CSS, JavaScript, Git version control system, PostgreSQL, cPanel

I developed a web application for a seaweed farmer to showcase the products. The app consisted of a back-end server written in Python with Django, which communicated with a

PostgreSQL database hosted on cPanel. The front end was built using React, allowing a smooth and responsive user experience. Check out the link below

<https://mwani.africa/>

The Movie App

Tools: Html, Css, JavaScript

The movie app fetches movies from the movie database then you can play the trailer on YouTube.
