Seller Functions

Registration and Login

1. **System Administrator** registers the Seller and Bank.
2. Seller receives an email to set their password.
3. Upon successful password setup, the Seller can log in to the system.

Dashboard Overview

- **Supply and Demand Statistics:** Sellers can view these for decision-making.
- **Letters of Credit and Quotations:** Both approved and rejected.
- **Item Supply History:** Detailed records of past supplies.
- **Inventory Items:** View items with cumulative totals.
- **Weight Comparison:** Track item/breed tag numbers throughout the supply chain and compare weights.

Buyer Management

1. Seller registers the Buyer.
2. Buyer receives an email to set their password and logs in.
3. Seller sends a quotation to the Buyer based on prior agreements.
4. PDF documents for both Buyer and Seller are auto-generated.
5. Buyer receives an email with the new quotation and PDF.
6. Buyer can accept or reject the quotation:
 - If rejected, they must provide a reason.
 - If accepted, the Buyer communicates with their bank to send a Letter of Credit (LC) to the Seller's bank.

Letter of Credit (LC) Management

1. Bank sets their password upon registration and logs in.
 2. Bank uploads the PDF received from the Buyer's bank.
 3. The PDF should contain:
 - Clause 93A: Item description
 - Clause 93B: Weight in kilograms
 - Clause 93C: Delivery date
 4. Seller accepts or rejects the LC:
 - If rejected, a reason must be provided.
 - If accepted, the system converts weight to quantity and broadcasts the requirement to registered breeders.
-

Buyer Functions

Quotation Management

1. Receives email notification for new quotations.
 2. Reviews and accepts or rejects the quotation:
 - If accepted, coordinates with their bank for LC issuance.
 - If rejected, provides a reason.
-

Bank Functions

LC and Payment Management

1. Uploads LCs received from the Buyer's bank.
 2. Views Bill of Lading documents during exports.
 3. Monitors LC statuses and payment confirmations from Inventory Managers.
 4. Processes payments based on confirmation statuses.
-

Breeder Functions

Supply Management

1. Logs in to view required quantities.
 2. Fills in the supply form based on capacity.
 3. Tracks supply history and status changes.
-

Inventory Manager Functions

Supply Confirmation

1. Logs in to view unconfirmed supplies.
 2. Confirms received items.
 3. Tracks item statuses and payment processing.
-

Slaughter House Manager Functions

Item Management

1. Logs in to record item weights pre-slaughter.
 2. Fills in forms to deduct inventory items.
 3. Records export and local sale parts.
-

Chilled Warehouse Functions

Inventory Tracking

1. Records items based on slaughterhouse manager's input.
 2. Separates items into export and local sale categories.
-

Collateral Manager Functions

Inventory Oversight

1. Registered by the bank.
 2. Oversees inventory information for assigned control centers.
-

Export Manager Functions

Export Documentation

1. Fills in export details from Seller to Buyer.
2. Tracks export status.
3. Generates necessary documents like invoices and packaging information.
